**Election/Restrictions**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 11-20, drawn to a method of heating a food product, classified in class 426, subclass 241.
  - II. Claims 24-30, drawn to a method of making and preparing a food packaging article, classified in class 53, subclass 461.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product, Claims 1-10 and 21-23, which are drawn to an article and food packaged article, classified in class 219, subclass 730, is not allowable, restriction is proper between said method of making (Group III) and method of using (Group II). The product claims, claims 1-10 and 21-23, will be examined along with the elected invention (MPEP § 806.05(i)).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3742

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention between Group I and Group II to be examined even though the requirement be traversed (37 CFR 1.143). The product claims, Claims 1-10 and 21-23, will be examined along with the elected invention (Group I or Group II).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
